```
var gaJsHost = (("https:" == document.location.protocol) ? "https://ssl." : "http://www.");
document.write(unescape("%3Cscript src='" + gaJsHost + "google-analytics.com/ga.js'
type='text/javascript'%3E%3C/script%3E"));
```

```
try {
var pageTracker = _gat._getTracker("UA-7494641-2");
pageTracker._trackPageview();
} catch(err) {}
```

- Choosing the right Stick is easy! The process can be determined by taking into consideration the following factors:
  - a person's size (larger people usually have larger muscles)
  - muscle density (how compact/solid or dense the muscles are)
  - pressure preferences (a light VS deep massage)
  - body applications (whole body VS limbs)
  - how The Stick will be used (warm-up, stripping massage, training tool...)
- Once the above factors have been determined, it is now time to explore some options!!! Here is a brief description to how the different Models of Sticks compare:

### Short Models

### Rigidity

### Common Usage

### Addition Info.

Marathon Stick

Flexible

Lean muscles

Adults,Children,Seniors

Travel Stick

Standard

Average muscles

Great for travelling

Sprinter Stick

Stiff

Heavy muscles

Short and stiff

Medium Models

Rigidity

Common Usage

Addition Info.

Original Body Stick

Standard

Average muscles, full body

Very versatile

Stiff Stick

Stiff

Heavy muscles, full body

Stiff and powerful

Long Models

Rigidity

Common Usage

Addition Info.

Flex Stick

Flexible

Lean muscles, full body

Tall people

Power Stick

Standard

Average muscles, full body

Tall people

Big Stick

Stiff

Heavy muscles, full body

Tall people

## PostureCurve

The Posture Curve was physician developed to relieve back stiffness. The device safely stretches the spine - one segment at a time. The blue covers are non-slip rubberized inserts.

The PostureCurve helps to relieve back stiffness and pain. The device helps to stretch each vertebral joint with pin point accuracy. Use it while sitting to help relieve back tension and to recreate the spines natural curves.

The results of a University study found that " Back Stiffness was temporarily reduced by 26% after 3 minutes of segmental stretching with the PostureCurve."
